Pollutants in the car

Releasing negative ions

Negative ions are expelled into the car where they are attached to positively charged virus, bacteria, dust, pollen, cigarette smoke, odour, pet dander, chemical and others to form larger particles. Hence, it is easier for us to get rid of them.

360° HEPA Filter

360° High-Efficient HEPA filter removes 99.99%, 0.01 micron of air pollutants in the car. The 360° filter is designed for optimum air flow. With its high concentration of activated carbon, it can absorb dangerous chemicals, odours and volatile organic compounds (VOCs).

- Removes PM2.5
- HEPA filter
- Low noise
- Releasing of Anions
- Low energy consumption

CAR AIR PURIFIER | Product Specification

Rated Voltage	DC10-15V, 300-500mA	App Area	Car air purifier
Filter	HEPA	N.W	250g
Anion Concentration	5 million/cm ³	CADR	8m ³ /h
Product Size	74x74x170mm		

Use NeoAir MINI Car Air Purifier to eliminate pollutants such as...
