

Optimize Growth

Experience the benefit of Data Capture

At ParcelKiosk we enable our Clients to optimize their shipping operations through data accuracy. Our tools help businesses of all sizes improve their shipping decisions and achieve their "order to ship" performance.

1 Auto Dimension & Weight Data Capture	2 Image capture	3 Multiple communication ports (add-on's)	4 External Integration (BSC enables integration)
5 Product Footprint (fits in the smallest of spaces)		6 Mobile functionality (capable to mount on trolley)	
7 Friendly user experience (drives retention)	8 Easy to install and support	9 Low cost of ownership (ROI)	10 Certified and tested

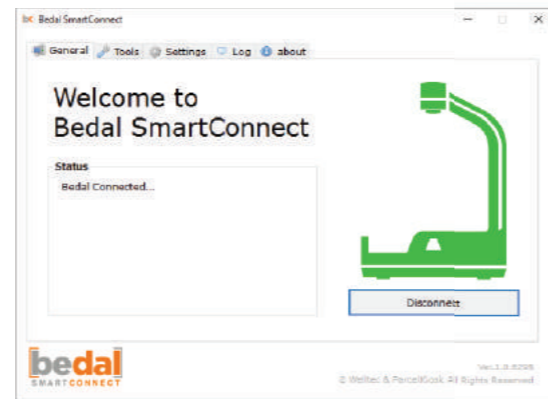

Integrate with Bedal

Optimization through Bedal reduces waste, improves decision making and drives customer retention.

The traditional way of parcel preparation and acceptance is cumbersome and risk prone. Your business can now improve order to ship metrics through affordable automation. Bedal 3S ensures package dimensions and weight are accurately captured and presented in your shipping platform for onward processing.

Our clients on average save up to 10% on shipping charges and see a vast improvement in resource efficiency.

BEDAL SmartConnect

Bedal SmartConnect (BSC) is a middleware that empowers the integration process between Bedal and your preferred shipping platform. BSC enables you to present captured data in various formats and control the performance of your dimensional platform.

- Collect Bedal measurement data
- Supports CSV and JSON formats
- Custom log save destination
- Parcel image capture and match with measurement
- Manual L/W/H and weight adjustment
- Bedal settings
- Integration with customers' system
- Bedal Code (dll and API)

"We selected Bedal because of its capability to integrate with our existing system. Bedal helped us by increasing the accuracy of our product dimensions, order size calculation and parcel size calculation. We were also able to implement a standard box size logic in order to standardize packing globally. Getting the dimensions right at the warehouse level enables us to negotiate better shipping rates with a range of carriers and most importantly we save a lot of man hours by eliminating manual measurement checks."

"Our finance teams would benefit because they no longer need to reconcile carrier statements. The data captured from Bedal would help our pricing team take crucial decisions when it comes to setting the right pricing models, without the risk of losing on freight costs."

Susie Stier
Logistics Manager

Reduce Waste

Transform your business by saving valuable resources.

Our solutions save our clients valuable time, reduce carbon footprint and free them from shipping errors. Cutting on operational costs help our clients compete and improve their performance metrics.
